

DIMPU NARASIMHA SAI BACHUPATI

Nandyal, Andhra Pradesh, 518502 | +(91)-9177041001 | dimpu.b2085@gmail.com | [LinkedIn](#) | [Leetcode](#) | [Github](#)

PROFILE

Motivated and detail-oriented Computer Science student with a strong foundation in Data Structures & Algorithms (DSA) and Competitive Programming. Passionate about solving real-world problems using Artificial Intelligence, Machine Learning, Deep Learning. Skilled in tools and frameworks like PyTorch, Scikit-learn, Flask, and Streamlit, with hands-on experience in end-to-end ML projects.

EDUCATION

- Bachelor of Technology – Computer Science and Engineering** 2022-2026
Mohanbabu University, Tirupati (CGPA-8.0/10)
- Intermediate - Maths, Physics, Chemistry** 2019-2021
Sri Chaitanya Junior College, Vijayawada (88%)
- SSC** 2018-2019
Sri Chaitanya High School (10/10)

PROFESSIONAL SKILLS

- Languages:** Python, SQL, HTML, CSS
- Frameworks & Libraries:** Pytorch, Scikit-learn, Pandas, NumPy, Seaborn, Matplotlib, Streamlit
- AI & Machine Learning:** Machine Learning (Supervised & Unsupervised), Deep Learning, Neural Networks, Natural Language Processing, Prompt Engineering
- Tools & Platforms:** Git & GitHub, Microsoft 365, Canva, Power BI, Docker
- Other Skills:** Data Structures & Algorithms (DSA – Python), OOPs Concepts

PROJECT

- Exploratory Data Analysis - EDA (Machine Learning)** Mar 2025
Performed in-depth EDA using Python libraries—Pandas for data wrangling, and Matplotlib & Seaborn for rich visualizations. Analyzed trends, distributions, and correlations within the dataset through bar plots, histograms, box plots, and heatmaps.
- Titanic Survival Prediction - ML Classification Report** June 2025
Built a survival prediction model using Titanic dataset – applied EDA, feature engineering, and logistic regression with 80%+ accuracy; visualized key trends with Seaborn and Matplotlib.
- EV Vehicle/Charging Demand Prediction** July 2025
Built a machine learning web app to predict EV charging demand using Scikit-learn and deployed it with Streamlit. Analyzed temporal and spatial EV usage data, achieving 89% R^2 on unseen data.

WORK EXPERIENCE

- ML Intern at TechnoHacks Solutions** Mar 2025 - Apr 2025
Worked on a hands-on Exploratory Data Analysis (EDA) project as part of a Machine Learning internship. Utilized Python along with Pandas, Matplotlib, and Seaborn to clean, explore, and visualize datasets. Generated insights by identifying patterns, trends, and anomalies through various data visualizations including bar plots, histograms, and heatmaps. Gained real-world exposure to data preprocessing and analytical thinking in a collaborative environment focused on practical upskilling.
- AI Intern at Edunet Foundation x Shell x AICTE** July 2025 - Aug 2025
Worked on Collaborated on the “EV Charging Demand Prediction” project using Machine Learning & AI techniques to forecast electric vehicle charging needs. Conducted EDA, feature engineering, and trained models using Scikit-learn to identify peak demand times and optimize station usage. Developed a fully functional Streamlit dashboard to visualize predictions and key demand patterns. Attended structured mentoring, AMA, and master sessions guided by industry experts from Shell and Edunet.

CERTIFICATIONS

- Python Essentials (CISCO)**
- Machine Learning Specialization – Coursera (DeepLearning.AI, Andrew Ng)**
